

Bridging Compassion & Technology

Smart Care Software for Residential Care Homes

What Synkwise means for families...

Better understanding for care staff

- + Our customized, easy to read reports lead to better understanding of loved ones' health condition and care needs.

Emergency Reporting

- + Vital information is accessed within a few clicks in the event of an emergency. This helps EMT's & ER Doctors make better decisions for your loved one.

Medication Management

- + Built-in safety mechanisms and tracking to improve medication administration while lowering the risk of med errors.

Health Tracking

- + The ability to track and identify trends leads to improved visibility for responsive / preventative care.

Nurse Accessibility

- + Synkwise allows assigned nurses to immediately access resident's health information from anywhere.

Secure Information Sharing

- + Providers are able to share information to PCP's and other medical specialists securely and efficiently. Improved communication yields improved results between responsible parties.

Quality of Care

- + Less time on redundant paperwork leads to more time on managing the care of your loved one.
